2023 CENTRAL FLORIDA GIS WORKSHOP

SEPTEMBER 11 - 12
OCEAN CENTER
DAYTONA BEACH, FL

www.cfgisworkshop.org

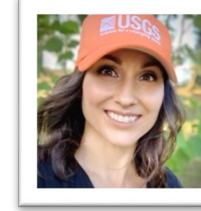

The Central Florida GIS Workshop Inc. welcomes you to their **16th Annual Central Florida GIS Workshop** at the Ocean Center, Daytona Beach. The Central Florida GIS Workshop Inc. is a volunteer effort arising from the work of a small number of dedicated GIS professionals in the Central Florida region and is a non-profit organization.

Many of the Board members are Geomentors. The Workshop offers teacher training periodically as well as participating in Teach-In and Tech Events at local schools. The Workshop worked this year with Esri to judge and facilitate awards for the Annual Esri Florida Middle and High School Story Map Competition. Some of our Board members are adjunct instructors at local colleges. We offer 2 annual scholarships to students in the geospatial field. We hope you will attend the Student Presentations and encourage the next generation!

Our Keynote Speakers

Kimberly Jackson is Florida's Geographic Information Officer (GIO). After a year of mapping fieldwork in Australia's National Park system, Kim started her career in GIS at the St Johns River Water Management District in 1990. She is Florida's representative to the NOAA Digital Coast Partnership and the National States Geographic Information Council.

Xan Fredericks works with the U.S. Geological Survey (USGS) as the National Map Liaison to Florida, Georgia, Puerto Rico, and the U.S. Virgin Islands. She collaborates with a variety of partners to aid the discovery and coordination of geospatial data, as well as the delivery of actionable, science-based information to resource managers, emergency responders, and the public.

Alicia (Ali) Pressel is an educator in the Saint Augustine area of Northeast Florida. Her goal is to ensure students connect their human involvement to the natural world, make a difference in their communities, and be inquisitive, lifelong learners. Ali provides authentic learning experiences to fuel student curiosity as youth become mapmakers, change makers and leaders of tomorrow.

Anthony Spicci is Executive Director at GISCI (GIS Certification Institute). During his thirty-one years in the emergency response community, Tony has seen the need for implementing geospatial information programs and coordination across a wide spectrum of response groups. He continues volunteering within the response community to promote the use of geospatial technologies.

Alexis Thomas has been at The University of Florida GeoPlan center for 30 years, the past eight as Director. He has been involved with the Florida Geographic Data Library (FGDL) since its inception in 1996.
